

Motivity Personnel Tracker is a simple to use satellite tracking system that is ideal for businesses that need to plan and schedule daily jobs for field workers. It is also a useful tool to help with lone worker security.

The system provides you with up-to-date location information about your field based workforce when they are travelling to their jobs.

For existing Motivity customers this is available as a built-in option to your existing software. It is also available as a stand-alone version for non-Motivity customers.

## Cost for 12 Months Subscription:

**Existing Motivity Customers**  
(This works seamlessly and invisibly within your existing Motivity mobile software)
